PROFILE SUMMARY

Driven final-year B.Tech student skilled in software development, data science, and AI. Combines a strong analytical background, demonstrated by qualifying GATE 2026, with hands-on experience in modern frameworks and machine learning pipelines. Adept at bridging the gap between complex data models and functional, user-facing software. Seeking an entry-level technical opportunity to leverage versatile programming skills to drive organizational goals.

ACADEMIC QUALIFICATION

- Bachelor of Technology – Artificial Intelligence and Data Science**
Muthoot Institute of Technology & Science, affiliated to APJ Abdul Kalam Technological University
CGPA: 8.21 out of 10 | Expected Graduation: July 2027
- GATE 2026 – Data Science and Artificial Intelligence**
All India Rank: 5472 | Year: 2026

PROJECTS

Crop Detection using Satellite Imagery 2025

Objective: Engineered a competitive-grade computer vision pipeline for agricultural monitoring. Designed and trained a PyTorch U-Net model to process satellite imagery, translating complex pixel-wise masks into actionable data.

Technology Used: PyTorch, U-Net, Python, Data Augmentation, Kaggle Datasets

Key Results: Achieved 89% classification accuracy and 70% IoU score

Nyaya Flow – RAG-Based Legal AI Assistant 2025

Objective: Developed the backend architecture for a legal AI assistant chatbot. Integrated LangChain, local LLMs, and vector databases to create a scalable data retrieval system that processes and explains complex legal transitions without manual lookup.

Technology Used: LangChain, Local LLM, Vector Databases, Python, RAG Pipeline

Link: github.com/devjobit/nyayaflow

ALLOY-GPT: Multimodal Inverse Design Framework for High-Performance Metal Alloys April 2026

Objective: Architected a multimodal framework integrating machine learning and optimization algorithms. Designed the system in Python to dynamically process user requests, execute genetic algorithms, and output custom, thermodynamically stable designs efficiently.

Technology Used: Machine Learning, NLP, Optimization Algorithms, Materials Informatics, Python

CORE COMPETENCIES

Technical: Python, R, SQL, JavaScript, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, LangChain, RAG, Local LLM Integration, Vector Databases, MySQL, MongoDB, React.js, Node.js, Express.js, Hadoop (Beginner), Git, Jupyter Notebook

Soft Skills: Problem Solving, Leadership, Teamwork, Communication, Time Management

CERTIFICATIONS & COURSES

- Artificial Intelligence: Search Methods for Problem Solving – NPTEL | 2025

POSITION OF RESPONSIBILITY

Placement Student Coordinator, Department of AI & DS, Muthoot Institute of Technology & Science 2025 – Present

Description: Serve as the primary student liaison for placement activities within the AI & DS department, coordinating placement-related communications, schedules, and student preparedness initiatives.

LANGUAGES KNOWN
